

OPEN CALL FOR E-DELPHI SURVEY

Future Stakeholder Needs and Interests in Mineral Safeguarding and Land Use

Dear Mining & Land Use Planning Expert

Competition between land uses in Europe is expected to remain strong in the coming decades and many European mineral deposits are at risk of not being adequately protected for future potential use. Technology is rapidly changing and demand for new materials is emerging. What will be the consequences for Europe? Will European mineral resources become more important in the future? How can we ensure they remain protected?

We're conveying an **online DELPHI Survey** between **29th October and 30th November 2018** to collect your vision on future stakeholder needs and interests associated with land use planning and mineral safeguarding in Europe. If you are interested and able to voluntarily devote around 3 hours to the whole study in that period, please REGISTER HERE:

https://ec.europa.eu/eusurvey/runner/MinLandDelphiSurvey_registration

and we will evaluate your profile with a chance to becoming part of our **Panel of Experts**. We look forward to receiving your application.

Deadline: 25 October 2018.

Warm regards from the MINLAND team!
